

# MOBILE DISPLAY TOWER OPTIONS

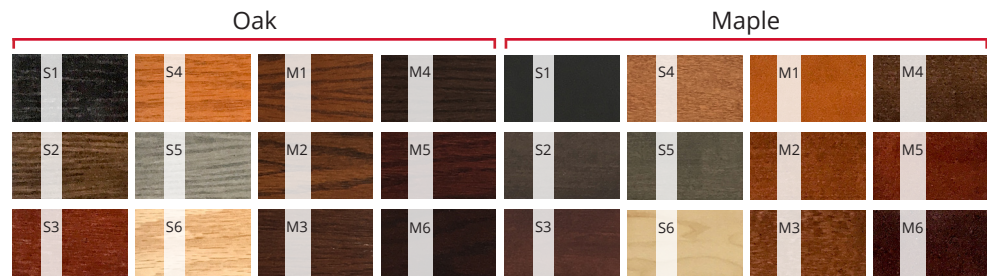

SICO® Display Towers have several options that will allow for brand and decor matching. See below for a full list of our standard finish options. All shelves are able to be finished on both sides in either laminate or wood veneer. Laminate allows for two different options on each side. The wood veneer option must be the same on both sides of the shelf. The frame is finished in powder coat or brushed stainless steel.

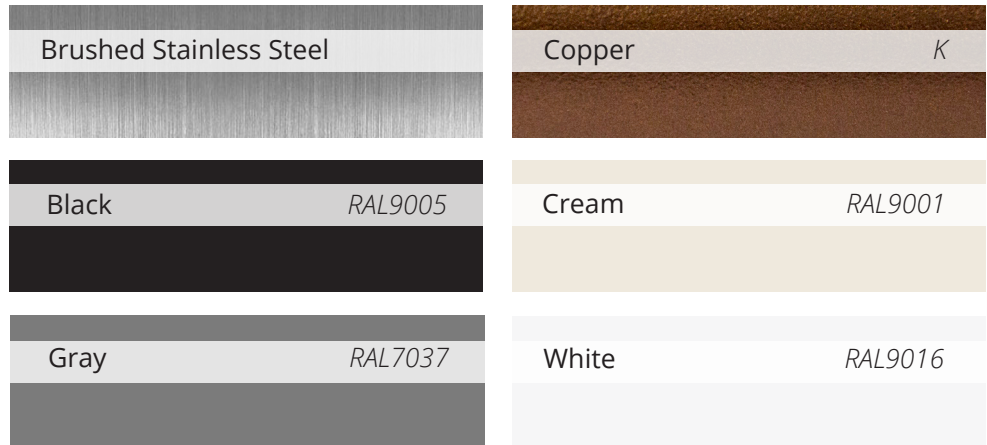

## Laminates

## Wood Veneer

## Frame Finishes

\*All options are subject to change. Colors are representative only.
